

Prescribing Guide: Biosimilars for Humira

Quick start

1

Select the biosimilar for Humira most appropriate for your patient's treatment plan.

2

Include the brand name or adalimumab + 4-letter suffix to help prevent clarification requests.

3

Send prescription referrals to CVS Specialty®.

**Branded and unbranded biosimilars share the same biologics license application and may be dispensed with the corresponding unbranded or branded biosimilar as deemed by the prescription benefit plan.

FDA-approved indications and usage

All biosimilars for Humira have been approved for:

- Ankylosing spondylitis
- Crohn's disease (6+)
- Hidradenitis suppurativa
- Juvenile idiopathic arthritis (2+)
- Plaque psoriasis
- Psoriatic arthritis
- Rheumatoid arthritis
- Ulcerative colitis
- Uveitis

Due to patent exclusivity (subject to change), biosimilars for Humira are not yet approved for pediatric uses in these indications and ages:

- Hidradenitis suppurativa in pediatrics 12–17 years
- Uveitis in pediatrics aged 2 and older
- Ulcerative colitis in pediatrics 5–17 years

Formulary reminders

1

If your patient already has a PA for Humira, most prescription benefit plans will transition the PA to the covered alternative biosimilar for Humira. If your patient's PA has expired, a renewal should be requested.

2

If you select a new replacement therapy, you will need to send CVS Specialty a new prescription and submit a new PA request to your patient's prescription benefit plan.

3

Patients not filling at CVS Specialty will need to check with their specialty pharmacy. Patients can refer to their prescription benefit plan for formulary updates and changes.

PFS (Pre-filled syringe). FDA (U.S. Food and Drug Administration). PA (Prior authorization).
